To Whom It May Concern:

Letter of recommendation

I am writing this Recommendation Letter for Germán Corrales Madueño in my capacity as an Associate Professor at the group of Antennas, Propagation and Radio Networking within the Department of Electronic Systems at Aalborg University. Germán has worked as a student helper on a project led by me from the autumn 2010 until the summer of 2010. During that period I had multiple meetings and interactions with Germán, such that I got to know him and his engineering abilities.

I consider myself very fortunate to have Germán and the team of other two students working as assistants on the research project. The project dealt with innovative coding methods for sending data reliably over off-the-shelf wireless systems. The objective of the project was to create a proof-of-concept demonstration of these coding methods and show that a usual WiFi system can continue to operate even under excessive interference. The team of Germán and his co-workers have shown excellent skills and dedication in tackling the project, such that within a very short time we obtained real-life demonstrator as well as experimental results.

Germán acted as an informal leader of the team of research assistants and his engineering/management skills were one of the key factors in bringing the project to a success. Germán has a very high level of motivation to pursue engineering ideas towards making them workable technology solutions. During the project, he has demonstrated excellent command of four rather different skills: (1) efficient implementation (2) ability to provide innovative ideas (3) creative design to communicate the results, and (4) well-organized and punctual management of the project. It was a real pleasure to see all these skills and experience in a person still pursuing his master degree.

Therefore I am giving my unreserved recommendation to Germán for a research or engineering position in the area of wireless communication and networking. If required, I will be happy to provide additional information on my positive experience with Germán.

Sincerely,

Petar Popovski, Ph. D.

Letter of Recommendation

It is my pleasure to write this Letter of Recommendation in support of Mr. German Corrales Madueno. In my capacity as PhD Fellow at the group of Antennas, Propagation and Radio Networking within the Department of Electronic Systems, at Aalborg University (AAU), I supervised the semester projects of Mr. Madueno from February 2010 through June 2011, where he earned the highest possible mark defending his Master Thesis.

It has been a very positive experience working with Mr. Madueno. He has a happy and positive personality, is highly motivated and hard working. This is proven by the fact that he, during his full-time studies at AAU, pursued the equivalent Master degree from University of Malaga, Spain.

The skills of Mr. Madueno spans wide and he possesses a systematic mindset and approach to the project work, and can quickly obtain an overview of the practical challenges. Planning and engineering excellent solutions falls natural to him, and he is therefore often one of the driving forces behind the practical system implementations. Additionally, he has a healthy curiosity which will bring him around every aspect of a project.

With these characteristics, I can unreservedly recommend Mr. Madueno as a talented student and engineer with great potential. I will be happy to provide you with detailed information on my positive experience working with German Corrales Madueno.

Sincerely,

Rasmus Krigslund, M.Sc.
